University of Toledo • 2010

Certifications

ITIL v3 Foundations • 2009

Work Experience

Tech Support Specialist II & Web Developer

RELX Group, June 2001 to Present

- Developed & maintain team's asset management (PAM) web application, stream-lining hardware-related processes from acquisition to retirement - providing accurate equipment tracking & reporting. App is also used by support teams in Raleigh, NC & the UK.
- Created a RESTful web service to facilitate PAM's integration with workflows in ServiceNow.
- Mocked & built templates for an innovation feedback tool run on the UserVoice platform.
- Provided styling changes using Sass/SCSS to reflect branding for Service Desk's ChatBot.
- Developed a small web app to route software requests to proper support teams, allowing managers to approve & track their progress.
- Redesigned a survey application that tracks customer satisfaction for support teams and allows teams & individuals to view results for continuous improvement.
- Drove process improvement through web applications & automation scripts written in PowerShell and Bash.
- Designed & maintain relation SQL databases for web apps, occasionally writing custom queries for management reports.
- Also responsible for coordinating logistics of equipment deployment and inventory management for campus, remote offices, and home-based employees.
- Created documentation of standard processes regarding configurations.

Board Member (Newsletter Editor & Webmaster)

Wayne Music Club - <http://www.wayneband.com/>, Jan 2020 to Present

- Collects information to assemble and publish the group's newsletter.
- Available to help at different events when needed.
- Maintain web site and hosting configurations as well as publish content to the blog, event calendar, photos, and videos.
- Redesigned the web site for the non-profit organization that supports the band programs at Wayne High School.
- Worked with their existing WordPress installation, using its resources as a headless CMS (via REST API) on a custom built Vue.js site.
- Created custom endpoints for posting videos, photos, events, and links so all content is managed from the WP back-end.

Web Developer

Cold Callers Guild - <http://www.mmocentralforums.com/ccg/>, Mar 2015 to Jun 2015

- Secure Registration & Login via vBulletin API
- Custom CRUD interfaces for user profiles and admin control panels.
- Interactive forms for member lists, schedules, and event reporting.
- Built with HTML, CSS, PHP, MySQL, and JavaScript.
